-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 6-12, 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Takeuchi (JP06126098A).

Takeuchi shows a method and an apparatus for cloth dewatering. The cloth 12 is successively brought in contact with absorbent body 23 of absorbent material 38, 40 same as applicant's.

### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out

Art Unit: 3749

the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Takeuchi (JP06126098A).

The cloth dewatering apparatus of Takeuchi as above includes all that is recited in claim 13 except for the material of the absorbent body. However, examiner takes official notice that it is well known in the moisture removing art to use microfiber material as absorbent. Therefore, it would have obvious to one having ordinary skill in the art at the time the invention was made to provide the cloth dewatering apparatus of Takeuchi with a microfiber absorbent in order to improve the dewatering efficiency.

6. Claims 5, 15, 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Takeuchi (JP06126098A) in view of Henry et al. (U. S. Pat. 6,722,053).

Takeuchi shows a method and an apparatus for cloth dewatering. The cloth 12 is successively brought in contact with absorbent body 23 of absorbent material 38, 40 same as applicant's. Henry et al. teach a concept of using pressure-exerting roller 5 for squeeze drying same as claimed. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the cloth dewatering method and apparatus of Takeuchi with pressure-exerting roller as taught by Takeuchi in order to remove the moisture from the absorbent body by squeezing. With regard to the claimed material of the absorbent body in claim 16, examiner takes official notice that it is well known in the moisture removing art to use microfiber material as absorbent. Therefore, it would have obvious to one having

Art Unit: 3749

ordinary skill in the art at the time the invention was made to provide the cloth dewatering apparatus of Takeuchi with a microfiber absorbent in order to improve the dewatering efficiency.

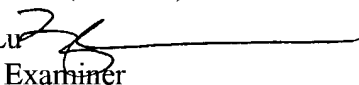

### *Conclusion*

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Candor et al. (U. S. Pat. Shows a method and apparatus for treating sheet-like material. Georges (U. S. Pat. 4,592,497) shows heating coat-hanger for garments. Bolduan et al. (U. S. Pub. 2004/90000068A1) shows a method and apparatus for drying items of clothing. JP 08049161 shows a clothing drying device. Ishimi et al. (JP61007100) shows a drying apparatus.
